EB/EBK with Revent Air Wash

Revent Air Wash is one of the most sophisticated humidification system on the market – yet easy to use and maintain. The heavy duty system is broadly used in large wholesale bakeries around the world .

Humidifier EB-10

This humidifier is equipped with elements with a heating capacity of 10 kW. The maximum heating capacity for one unit is 65 square feet/6m². Up to 6 EB-10 units can be connected to 1 control unit.

Humidifier EBK-10

This unit is for combined retarding/proofing rooms. The difference compared to EB-10, is that the humidifier has been equipped with a cooling coil unit on the inlet side. A suitable compressor has to be obtained locally – not supplied by Revent - as well as expansion valve, filter, pressostat, solenoid valve, inspection glass and tube. These components have to be installed by a local refrigerator engineer.
